

CDG-500 Capacitance Diaphragm Gauge

JEVINSTRUMENTS.COM

The Agilent CDG-500 series of temperature compensated capacitance diaphragm gauges provides the highest level of accuracy in the high-pressure region. Full-scale measurement ranges are available from 1000 to 1 Torr (1333 to 1.3 mbar).

The CDG-500 series uses a corrosion resistant ultra pure alumina cer diaphragm providing exceptional signal stability, fast recovery from atmospheric short warmup times, and unparalleled robustness.

Used in a variety of applications such as thin film and vacuum processes, industrial vacuum processes, data storage, and semiconductor production processes.

Features	Benefits
Full scale ranges from 1 to 1000 Torr with push button zeroing and optional set point control	Ease of integration
Excellent long term signal stability and repeatability	Long term performance – comparable to competitor's heated versions
Fast recovery from atmospheric pressures and rapid stabilization after start-up	Reduces process cycle times
Corrosion resistant ceramic sensor with sensor shielding protection	Application robustness
